## CREDITS

Adapting this bike (my first in 25 years and the first ever that I've paid serious attention to as a design challenge) has been a genuine post-doc-level excursion into the fascinating culture of bicycles and their design. Each of the vendor sites listed above is a trove of information and a rich source for links to others.

In addition to them, thanks go out especially to:

Ezra Caldwell at <http://fastboycycles.com/index.html> & <http://www.fastbofenders.com/>,

Ari Samsky at <http://www.splicetoday.com/sports/saddle-up>,

and all the contributors at <http://www.sheldonbrown.com/>, among many others.

Local colleagues, supporters and tolerant friends include:

Tristan Pittard at <http://www.taggstudios.com/web.htm>

Jamo Wright & Denise Hammer at Wright and Hammer Architects

Greg Overman & Dave Salinas at The Bike Coop, <http://www.bikecoop.com/>

Jake Gutierrez, preeminent Trout Hunter

Danny Lopez

Tim Kehoe

Kip Allen

Finally, anyone serious (in a fun way) about bikes will want to pick up a copy of *Bicycling Science* by David Gordon Wilson with contributions by Jim Papadopoulos - 3<sup>rd</sup> edition (Cambridge, The MIT Press, 2004). It already looms large in the next project — *Stay tuned...*
